

CORNERSTONE INFRASTRUCTURE

GOVERNMENT IT MODERNIZATION | ENDPOINT MANAGEMENT | CYBERSECURITY

CORE COMPETENCIES

- Endpoint management and device lifecycle (Microsoft Intune, Windows Autopilot, Addigy, Apple Business Manager)
- Microsoft 365 and Azure cloud migration for government environments
- Vulnerability management, patch management, and CIS Benchmark-aligned security hardening
- Identity modernization with Microsoft Entra ID
- IT modernization roadmaps for state, county, municipal, and small public-sector agencies
- Microsoft Defender deployment and endpoint security policy management

DIFFERENTIATORS

- Government-only client focus, with no divided attention across commercial industries
- Small-business agility paired with enterprise-grade delivery standards
- Security-first architecture applied by default on every engagement
- Direct access to senior engineers rather than layered account management

PAST PERFORMANCE

Representative engagements, supported agencies, and outcomes available upon request and reference approval.
